DETAILED ACTION
Amendment

The amendment file 10 October 2006 has been entered into this application.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 1 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claim is directed to a judicial exception for it is an abstract idea as such, pursuant to the Interim Guidelines on Patent Eligible Subject Matter (MPEP 2106), the claim must have either physical transformation and/or a useful, concrete and tangible result. The claims fail to include transformation from one physical state to another. Although, the claims appear useful and concrete, there does not appear to be a tangible result claimed. Merely forming a threshold value for the calculation of an image indicating an error would not appear to be sufficient to constitute a tangible result, since the outcome of the forming a threshold value step has not been used in a disclosed practical application nor made available in such a manner that its usefulness in a disclosed practical application can be realized. As such, the subject matter of the claims is not patent eligible. As to the dependent claims, none of the dependent claims add a tangible result to the independent claim 1.

Allowable Subject Matter

Claims 7 and 13 are allowable.

As to claims 7 and 13, the prior art of record, taken alone or in combination, fails to disclose or render obvious calibrating a first image of each array structure as defined in the

Art Unit: 2877

specification for selected locations on the lithography mask, in combination with the rest of the limitations of the claim. Claims 8-12 and 14-21 are allowable by virtue of their dependency.

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101, set forth in this Office action.

As to claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious calibrating a first image of each array structure as defined in the specification for selected locations on the lithography mask, in combination with the rest of the limitations of the claim. Claims 2-6 are allowable by virtue of their dependency.

Additional Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed in the attached form PTO-892 teach of other prior art a method for inspection of periodic structures on a lithography mask using a microscope.

Response to Arguments

Applicant's arguments/remarks, see pages 2-4, filed 10 October 2006, with respect to the rejection(s) of claim(s) 7, 13-14, 18 and 8-12, 15-17 under 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made.

Examiner apologizes for the inconvenience, but upon further consideration, a new ground(s) of rejection under 35 U.S.C. 101 has been made to claim 1.
